

How to Make Your Own Exploration Kit

Choose a container that is large enough to hold all of your exploration materials and is easy for you to carry.

Exploration Materials:

A **sketchbook** and **pencils** to make observational drawings while exploring.

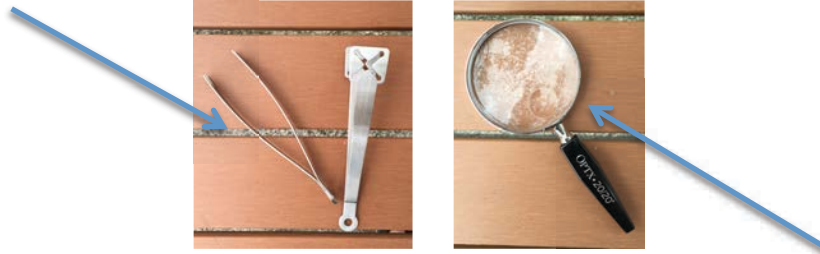

A **notebook** to write down important information about your explorations.

Brushes of different sizes to reveal and clean delicate discoveries.

Tape of different widths and colors for many different exploration projects.

Small tongs to collect tiny specimens during your explorations.

A **magnifying glass** for closer observation of specimens discovered.

A **tape measure** to measure all sorts of discoveries.

An **observation container** to observe and study living creatures.

A **sorting tray** to sort and categorize interesting discoveries.

A **collection box** to save any interesting discoveries.
